

STATE-OWNED ENTERPRISES IN DEVELOPED MARKET ECONOMIES

February 19, 2025 – 5pm–6:30pm CET

Webinar on Microsoft Teams

This Element offers a survey of various analytical frameworks on State Owned Enterprises (SOEs) from the perspective of applied welfare economics. The focus then shifts to a positive analysis of the comparative performance of private versus public enterprises, with a specific emphasis on SOEs in developed market economies over the past two decades;

key metrics examined include profitability, productivity, internationalisation, innovativeness, and environmental sustainability. Overall, the Element aims to redefine a neglected research area in public economics, considering the new circumstances of the twenty-first century, where SOEs compete with other firms in developed market economies.

Authors: Chiara F. Del Bo, Massimo Florio, Marco Frigerio, Daniela Vandone

A PDF version of the book will be available for a free access period at: [Link will be available from Feb 14](#)

PROGRAM OF THE WEBINAR
